From **MISS**  *Jema*

# A Note From

MISS Jem

This download includes printable game boards that can be laminated for continued use. There are 6 alphabet games, with each game having a lower case and upper case version. I copy them back to back to make one game board, which allows students to choose the version that they want to play.

I have included both a coloured version and black and white version so that you have a choice with the way you print the game boards.

# Game Instructions

Number of Players

1

Equipment

1 game board and 26 counters

Decide if you will play the lower case or upper case game.

Put one counter on each letter of the alphabet, in alphabetical order.

This game could be played with other students, where they are in a race to cover up their own alphabet game board the quickest.
